Experience

- 2019–Present **Senior Software Engineer**, GRUPO QUINTOANDAR, São Paulo, Brazil.
TODO
- 2015–2019 **Senior Software Engineer**, CEGAL AS, Oslo, Norway.
Working on software for Oil & Gas exploration and production for Petrel E&P Software Platform using mostly C#.
Lead developer on Blueback BluePrint, an automatic and customizable reporting tool for complex exploration data, and other service projects for external clients.
Part of the development of Blueback Rocks Velocity, a versatile seismic velocity tool used for processing and analysis; Blueback Toolbox, a bestseller pack with dozens of products encompassing most of the areas of oil exploration and production and Blueback Inevstigator, a powerful cross-domain multi-dimensional data analysis tool.
- 2013–2015 **Research Software Engineer**, GEOIMAGING SOLUTIONS, Rio de Janeiro, Brazil.
Research projects on high end geophysical imaging using high performance computing for Oil & Gas industry.
Integration of Full Waveform Inversion (FWI) and Reverse-time Migration (RTM) and other signal processing algorithms using C++ and Fortran with Big Data on Linux HPC clusters.
- 2010–2013 **Software Engineer**, SCHLUMBERGER, Rio de Janeiro, Brazil.
Design and development of new products and technologies of software for Oil & Gas exploration and production, particularly on geophysical tools for Petrel E&P Software Platform. Comprehensive desktop programming experience using Fortran, C, C++ (CLI and native), C# and Java and integrating 40 years old legacy code to .NET applications.
- 2006–2010 **Software Engineer Intern**, MICROSOFT INNOVATION CENTER, Campinas, Brazil.
Research and development in Distributed Systems with emphasis in Interoperability, High Performance Computing, Virtualization and Cloud Computing, using both Microsoft and open source platforms.
Conceived and implemented server applications to coordinate load balancing on distributed systems using technologies like C#, Powershell and Windows Server family products as Failover Clustering, HPC Server and Hyper-V.

Education

- 2006–2011 **Computer Engineering**, *University of Campinas (UNICAMP)*, Campinas - Brazil.
Modality AA – Computer Systems
- 2004–2006 **Pilot Officers Graduation Course (Curso de Formação de Oficiais Aviadores)**, *Brazilian Air Force Academy (Academia da Força Aérea)*, Pirassununga - Brazil, *Unfinished*.
Ranked as Air Force Cadet.
Course curriculum covers the areas of Military Aviation and Business Administration.

Publications

2010 **ViCOS - Virtual Cluster Orchestration System**, *CLCAR - Latin American Conference on High Performance Computing*, ISBN 978-85-7727-252-5.

An environment aware load balancing virtual cluster system that coordinates virtual machines that offer some service (HPC, SOA, etc) in a failover cluster, making a multipurpose environment which the main goal is to reduce the wasting of the infrastructure's computational potential.

Languages

Native	Portuguese	
Fluent	English	
Intermediate	German	<i>A little bit rusty</i>
Intermediate	Spanish	<i>Lived next to Argentina</i>

Technical skills

Programming Languages

C/C++	<i>6 years</i>
C#	<i>7 years</i>
Python	<i>3 years</i>

General Courses

2017	Machine Learning	<i>Coursera</i>
2012	Lean Management Workshop	<i>Industrial Logic</i>
2012	Applying Advanced Object Design with Patterns	<i>Craig Larman</i>
2011	Open Inventor Development	<i>VSG</i>
2010	Smart Grid Research & Gateway Development	<i>IBM/Tivoli</i>
2009	Network Performance Reporting	<i>IBM/Tivoli</i>
2009	Principles of Telecommunication Networks Managemen	<i>IBM/Tivoli</i>
